Bureau to Report on Monopolistic and Competitive

Systems.

ATLANTIC CITY, N. J., Oct. 21.—Joseph E. Davies, Commissioner of the Bureau of Corporations, announced to the National Association of Hardware Dealers here to-day that President Wilson plans to make a scientific investigation of the industrial situation with a view to having anti-trust legislation passed at the next session of Congress.

In its search for facts the bureau will try to determine which form of produc-tion, competitive or monopolistic, can produce and sell what the public buys most cheaply consistent with fair standards

of living for workers.

Mr. Davies said it was characteristic of the President that he should desire facts on which to base his judgment, and he gave assurance that the bureau would enter into this investigation with the sole intent of working out the facts in a scientific and fair minded spirit.

So vital and so fundamental is this "So vital and so fundamental is this problem," he said, "that to attack it in any other spirit would be criminal. What is needed is light, not heat. The problem bristles with difficulty. It will demand an increased appropriation from Congress. The results may not coincide with all we hope to secure, but we can however, obtain facts that will contribute toward correct interpretation of industrial conditions as they exist."

Mr. Davies said that the inquiry should disclose whether the problem might be

Mr. Davies said that the inquiry should disclose whether the problem might be solved by amendments to the Sherman act, by an industrial trade commission of by action looking to regulation by the individual States. In the event it should be found that the monopolistic system is the most efficient, he said, there would the most efficient, he said, there would be solved to be sufficient to the said. is the most efficient, he said, there would still remain a question whether the Gov-ernment should maintain an attitude against monopoly by reason of other and greater additional evils the system in-

The Commissioner gave a history of the great business development of the country, the formation and growth of the great corporations and said that in the last decade and a haif 200 corporations have come into property worth more than \$22,000,000,000, three times as much wealth as the country owned in 1850, or an amount three and a half times as great as the public debt.

In 1902, with an army of 58,000 men, all of whom were vaccinated for typhoid, there were fifteen cases and two deaths. This reduction is due to the vaccine.

"The army began the use of the vaccine in 1909, when there were 46,000 men. Only 1,800 men were vaccinated. There were 173 cases of typhoid and sixteen deaths. The following year there were 55,000 men in the army and 10,000 men were vaccinated. There were 129 cases of typhoid and nine deaths.

"In 1911 the whole army had been vaccinated and the typhoid cases dropped to forty-four, of which six resulted in death. And the following year there were only fifteen cases, two of which resulted in death. So it can readily be seen that the typhoid vaccine has greatly reduced typhoid."
